

International Summer School in Dalmine

CONSERVATION AND ADAPTIVE REUSE OF CONTEMPORARY HERITAGE SITES

20th JULY – 24th JULY 2017

School of Engineering - University of Bergamo - Viale Marconi, 5 - 24044 Dalmine

The summer school “Conservation and Adaptive Reuse of Contemporary Heritage Sites” will be held in Dalmine, Bergamo, from the 20th to the 24th of July 2017. The summer school introduces the most important principles of the Adaptive Reuse and Conservation tools and techniques. Students will get to know the theoretical background of conservation and how adaptive reuse is a tool to reverse process for heritage obsolescence. Adaptive reuse of heritage buildings does not only step up the maintenance of the structure and delay its decay, but it also helps the functioning building to get involved in the living context it lies within, unlike buildings that are deserted and disused. The activities will focus on the company town of Dalmine.
